AHMAD AL-HABAL

QA SPECIALIST | WEB DEVELOPER | PRODUCT OWNER

Adaptable professional with expertise in quality assurance, web development, and product ownership. Passionate about delivering high-quality digital solutions, leading cross-functional teams, and optimizing development workflows. Skilled in identifying customer needs, defining project scopes, and ensuring seamless execution from concept to delivery while maintaining a strong focus on user experience and business goals.

WORK EXPERIENCE

- Freelance Product Owner** 2024 DEC - PRESENT
 - Identified customer needs, scoped projects, and defined product vision.
 - Assembled, led, and worked closely with small teams to execute and deliver high-quality solutions.
 - Drove end-to-end project execution, ensuring timely delivery and client satisfaction.
- Westsidemarket (Vendor Management Platform)**
 - Quality Assurance Specialist 2024 JAN - 2024 AUG
 - Managed all aspects of quality assurance for product releases independently. Analyzed data to identify trends, patterns, and insights for improving product quality.
 - Conducted thorough testing and managed software and website projects to ensure high standards.
 - Building a database from scratch in an ERP system and managing all system compatibility
- Liveroute (Transportation Management Application)**
 - Quality Assurance Specialist 2023 DEC- 2024 MAR
 - Executed manual testing for mobile applications to identify software defects and ensure optimal product quality.
 - Documented test plans, software diagram, detailed bug reports, and test results, and tracked issues through to resolution using bug tracking tools
- Genophore (Life Sciences Research and Molecular Design)**
 - Quality Assurance Specialist , QA Manager 2021 JAN - 2023 DEC
 - Managed all Quality Assurance tasks for product releases on my own, ensuring high quality and timely delivery.
 - Trained and guided new testers about the work processes and platform features.
 - Worked with product owners and customers to discuss and define new features, making sure they met business needs.
 - Maintained a comprehensive history of the product, documenting all bugs and fixes for future reference.
 - Reviewed the team's work, providing feedback and ensuring it met quality standards.
 - Wrote detailed documentation on product features, test runs, and testing scenarios to support the QA process.
